MODIFIED FAN SONG RADARS AT SHAN-TAN, SAN-YUAN, AND WU-SHA-TA-LA SAM SITES, CHINA

This report is in response to NSA requirement NSA/SOC/R132-67, which requests mensuration and identification of the modified FAN SONG radars, at Shan-tan, San-yuan, and Wu-sha-ta-la SAM Sites, China (Figures 1, 3, 4, and 5). The identification of any other types of radars or communications associated with any of the above SAM sites was also requested.

The modified FAN SONG radar at the SAM sites appears to be the FAN SONG B with a 5-foot diameter dish antenna mounted on top of the horizontal trough. This is similar to the Type A except that the dish is more nearly centered (Figures 2 and 3).

A search of the immediate vicinity of the 3 SAM sites did not reveal any other radars or communications equipment; however, this does not preclude the possible presence of these components.

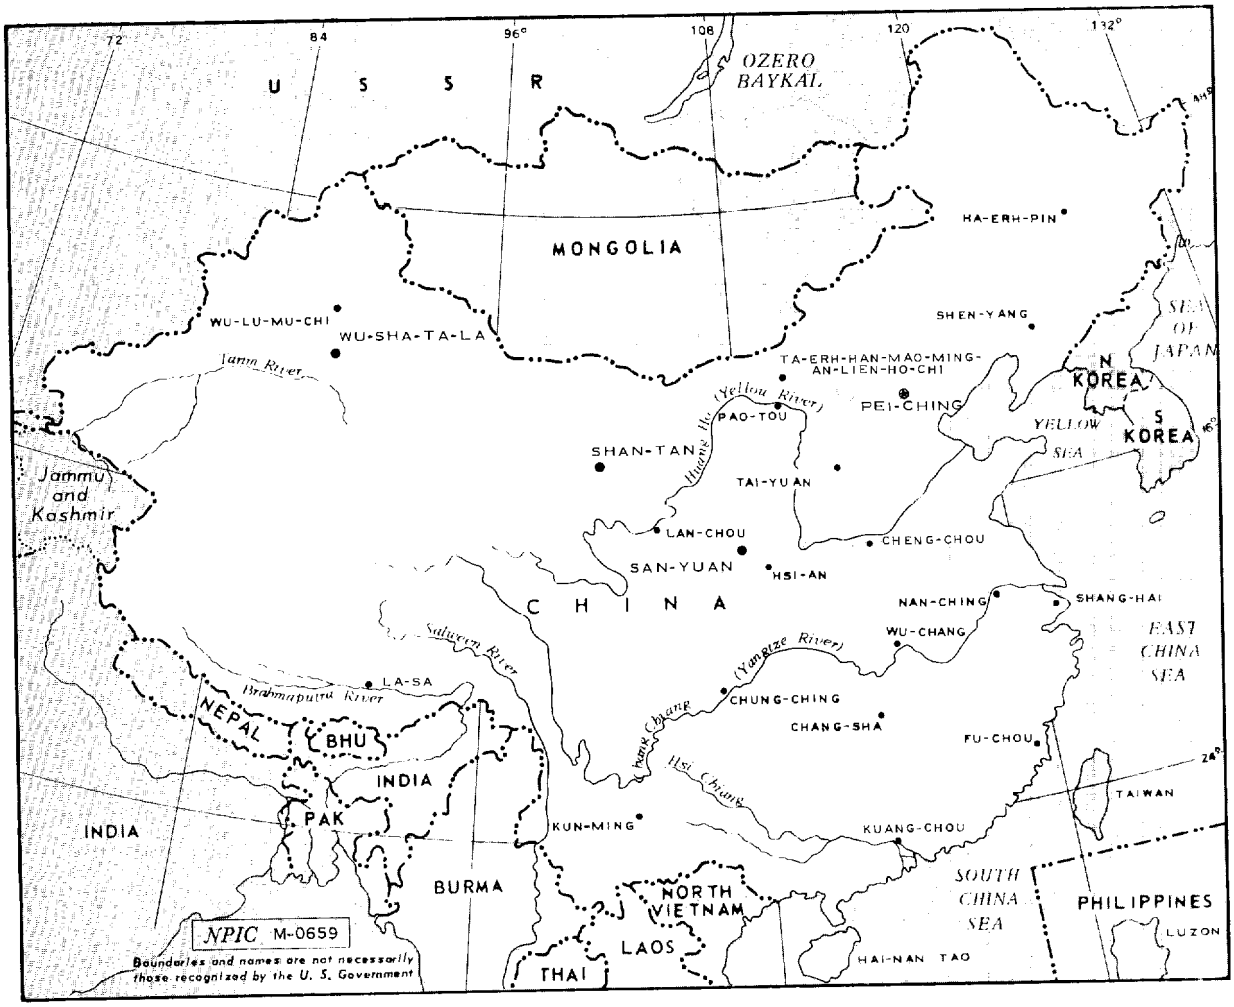

FIGURE 1. LOCATION OF SAM SITES WITH IDENTIFIED MODIFIED FAN SONG RADARS.
